

2. Agricultural Land

MO2.1	Development does not result in the fragmentation of agricultural land.
MO2.2	Development ensures that agricultural land remains available for land uses and activities that seek to utilise the quality of the land for <u>agricultural purposes</u> .
MO2.3	Development does not result in the introduction of land uses which could prejudice the efficient and effective operation of existing or future <u>agricultural purposes</u> , including <i>Stock Routes</i> .
MO2.4	Development that supports the efficient operation of <u>agricultural purposes</u> , such as supporting land uses and infrastructure, is only located on agricultural land where there is no alternative location available.
MO2.5	The function, connectivity and pasture productivity of the <i>Stock Route</i> network is to be maintained for sustainable use by travelling stock. The <i>Stock Route</i> network and existing pasturage rights are protected from incompatible development. Editor's note – Section 432 of the <i>Land Act 1994</i> specifies where pasturage rights exist.
