## Reporting requirements:

- The infrostructure charges register (register) template should be read in conjunction with Schedules 22 and 24 of the Planning Regulation 2017 (the Regulation).
- The register relates to councils who have a Local Government Infrastructure Plan (IGIP) in place and will include infrastructure change in control in the register relates to councils will be required to make this version of the register available online and to update it monthly. The register will also include new reporting requirements identified in the table above and referenced in the Schedule 24 register definition.

- An overview of how infrastructure charges revenue is collected and expended:
  Infrastructure charges are collected in monetary form and in non-cash form as trunk infrastructure may be provided by a developer in lieu of poying the levied infrastructure charges.
  Not all infrastructure charges that are levied through development are collected by the local government, as the development approval may lapse.
  Under the Planning Act 2016, infrastructure charges revenue that is collected in monetary form, is not required to be spent in the same suburb or locality where it was collected.

- Infrastructure charges revenue may be used to pay for shared regional scale infrastructure such as an arterial road or sewerage treatment plant.
- Offset provisions under the Planning Act 2016, also allow for an entire infrastructure charge, relating to more than one network, to be applied against the cost of infrastructure to be provided under a condition of development (i.e. the construction of an arterial road).
- Due to slow development growth, infrastructure charges that are collected may sit with a local government for a period of time, before being spent on trunk infrastructure.
